### **DETAILED ACTION**

This Office Action is in response to the amendment filed 14 October 2003.

#### ***Claim Rejections - 35 USC § 112***

Claims 63-84 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 63-84 disclose a tip portion supported by a "frustrum portion" and includes sidewalls, a coating not being along the frustrum portion. The frustrum portion is not disclosed in the specification and therefore is considered new matter.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 63,64,73-75,78 and 80, as far as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (U.S. Patent 5,619,097).

Art Unit: 2822

Jones discloses a display structure (Fig. 107) that contains a plurality of silicon-comprising emitter tips (13) with tip sidewalls and that terminate in a pointed apex, at least one of the emitter tips being substantially conical and comprising a tip portion, a coating (8) over the tip portion and comprising a first material (diamond, cesium and boron nitride) having a lower work function than silicon.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 65,67-69,71-72 and 81-84 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones in view of Takemura (U.S. Patent 5,666,020).

Jones discloses all the limitations except for the emitter tip to comprise conductively doped polysilicon. Whereas Takemura discloses an emitter structure (Fig. 3) that contains an emitter (20a/b) that contains an emitter tip (20a) that consist of conductively doped silicon such as polysilicon. The emitter is doped with conductive silicon such as polysilicon to form a higher resistivity in the tip area of the emitter. (Column 7, lines 25-30) Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the device of Jones by incorporating the emitter tip to comprise a conductively doped silicon such as polysilicon to increase the resistance of the emitter as taught by Takemura.

***Response to Arguments***

Applicant's arguments with respect to claims 63-84 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
